

The CareerSafe Online OSHA Training Program is an excellent way to educate your students on workplace safety. CareerSafe® is geared toward high school and college-aged students (16-24); the intent of the program is to provide students with the ability to ascertain risk and hazards associated with everyday life.

CareerSafe® is offered in both English and Spanish, providing students with alternative language choice options.

In September, CareerSafe® Online will be launching two new additions to the CareerSafe® program, the OSHA 10-Hour General Industry and the OSHA 10-Hour Construction Industry trainings. These two new additions will provide students with a “Blue Card” from OSHA along with a choice of which safety program is best suited for their needs and their prospective employer’s requirements.

CareerSafe® Online provides students with certification and knowledge of how to StartSafe and StaySafe in the workplace and at home. CareerSafe® is based in a youth-to-youth format that utilizes other students to interact with your students. A few of the many desirable factors of the CareerSafe® program include its flexibility for students learning styles, and the built in accountability tool for educators who are responsible to the local and federal governments.

The CareerSafe® Online program has educated over 60,000 students across the nation, including numerous Job Corp facilities.

The Cost of the CareerSafe program is \$12.00 per student, the cost of the 10-Hour courses is an additional \$6.00 per student. Perkins, WIA, and EETT funds may apply. Currently we are offering the CareerSafe OSHA 10-Hour courses for only \$15.00 per person for orders of 100 students or more.
